

THE WIND THAT SWAYS THE WHEAT SPIKES

SIEMBRA

The Siembra collection takes us into the world of natural fibres from a different point of view. The names of some cereals, which grew in the Mediterranean for many centuries, are used to bring to life a collection of double width, sheers and curtains where the colours and

different textures remind us of the grains and seeds that have served as food for people since ancient times. Just as the wind moves the spikes, our sheers sway inspired by the gentle Levante breeze. They let in the sun and give us warmth and intimacy.

DA VILA

*A MIX OF TECHNIQUES,
STITCHES AND MATERIALS*

A sheer fabric with buttonhole stitches embroidered in relief, inspired by the grains of corn. These relieves in order

give a surprising consistency and drape to a filmy, sheer fabric, simple and unique at the same time.

LINO

*THE WONDER IN THE
ESSENTIALS*

For us, Lino means the need to recover the essential sackcloth fabric. Its coarse aspect reminds us of the elemental fabric that protects cereals from the weather.

A return to austerity, to the elementary. The sack fabric we all recognise, made from 100% linen with a soft, supple finish. Available in three natural shades.

IMAGINARY VOLUMES

Sorgo grows irregularly, just like the plant that gives it its name, with unruly threads of 100% linen that come in and out of the weave at will. It is this

measured disorder that fills with charm, a relaxed sheer that is Oeko tex certified, which also makes it sustainable and ecological. Available in two shades.

Sheer SORCO 07

FALARIS

SOFT AND LIGHT

Falaris tones down the light with its irregular pattern. A lightweight, highly durable curtain in 100% polyester, with a crepe feel, combining white yarns in

the warp with coloured yarns in the weft, creating a subtle marbled effect. Versatile and practical, it is available in 4 neutral shades.

CANYAMO

SACRED PLANT

Canyamo, in its simplicity and composition, materialises our intention of recovering thousand-year-old fibres in a sheer with a plain weave, slightly open, where the

hemp threads show their irregularities providing smoothness, freshness and durability in a double width resistant, translucent and natural fabric.

M I J O

Mijo seduces us with its thick, curly appearance. The loops overlap the fabric creating a plush feeling of comfort. A double width fabric, with

body, perfect for both curtains and plaids to protect us from the cold. The three shades available refer to the colours of undyed wool.

B A M B U

PATHS OF HAPPINESS

Bambu alternates warmth and lightness. Yarns of wool run vertically, showing a curly, fluffy appearance alternating with

grooves woven in fine linen. The striped, rustic effect has a nice draping and relief, achieving a unique charm.

A V E N A

PURE LINEN

Avena hides a pattern of small tesserae arranged diagonally in its weave. This pattern gives the fabric consistency, also making it work as a light curtain. Available

in three shades, made of 100% European linen and woven in Spain, Avena seduces by being unusual, resistant and discreet at the same time.

NATURAL LIGHTS

Bulgur is a taffeta mesh reminiscent of the old tarlatan. Rustic and light in appearance, once washed at the right temperature, its

consistency gains body and an attractive rough effect. Bulgur is a European linen sheer made in Spain, available in natural shades.

C E N T E N O

Centeno is constructed in jacquard with a neat honeycomb shape. An embossed grid that gives the fabric a unique texture. Threads that join and separate rhythmically

creating a 'waffle needle' effect. Centeno is made from polyester, linen and viscose which gives it an extremely pleasant feel. Available in 3 shades.

Sheer CENTENO 10 - Cushion MESINA 06

SIEMBRA 92

TRIGO

Wheat spikes outlined in Trigo are constructed with an irregular jacquard woven pattern that adds lightness and

texture. A 100% linen sheer that elegantly filters the light through the subtle zigzag pattern and reminds us of shirt fabrics.
